

# Independent Cyber Attack Risk Assessment

Organizations share data with vendors but lack an assessment mechanism to quantify their cyber security risk exposures. This can be achieved through an independent cyber security assessment to evaluate a vendor's external exposures to being hacked.

## Why Now

### Vendors

are an integral part of an organization's supply chain

### 7 in 10

of organizations have experienced an attack due to an unknown asset (Shadow IT)

### 30%

of assets are unknown or unmanaged due to rapid transformation

# Assessment & Outcomes

## Black Box Discovery

This approach identifies vendor exposed enterprise assets in a high fidelity and low impact manner and is designed for low false positives to keep signal to noise ratio under control.

## Risk Based Vulnerability Prioritization

Prioritization engine combines the attacker's perspective with business value, business impact, existing security controls, and remediation status to build a ranked list of most risky exposures.

## Shadow IT Discovery

Rich integrations and policy driven rules engine make it easy to automate the discovery of Shadow IT.

## Assessment Report

Organizations get a summarised assessment report with a score for each key risk assessment area.

## Detailed Vendor Report

Vendors can access detailed report with recommended actions to help close their cyber security risks.
