Persistent

Accelerate your Roadmap with Bespoke Connectors

A complete solution with scoping, engineering, support, and sustenance built around your specific need and timeline with technology of your choice. Let your engineers build products, while we help build your connectors and streamline data flow!
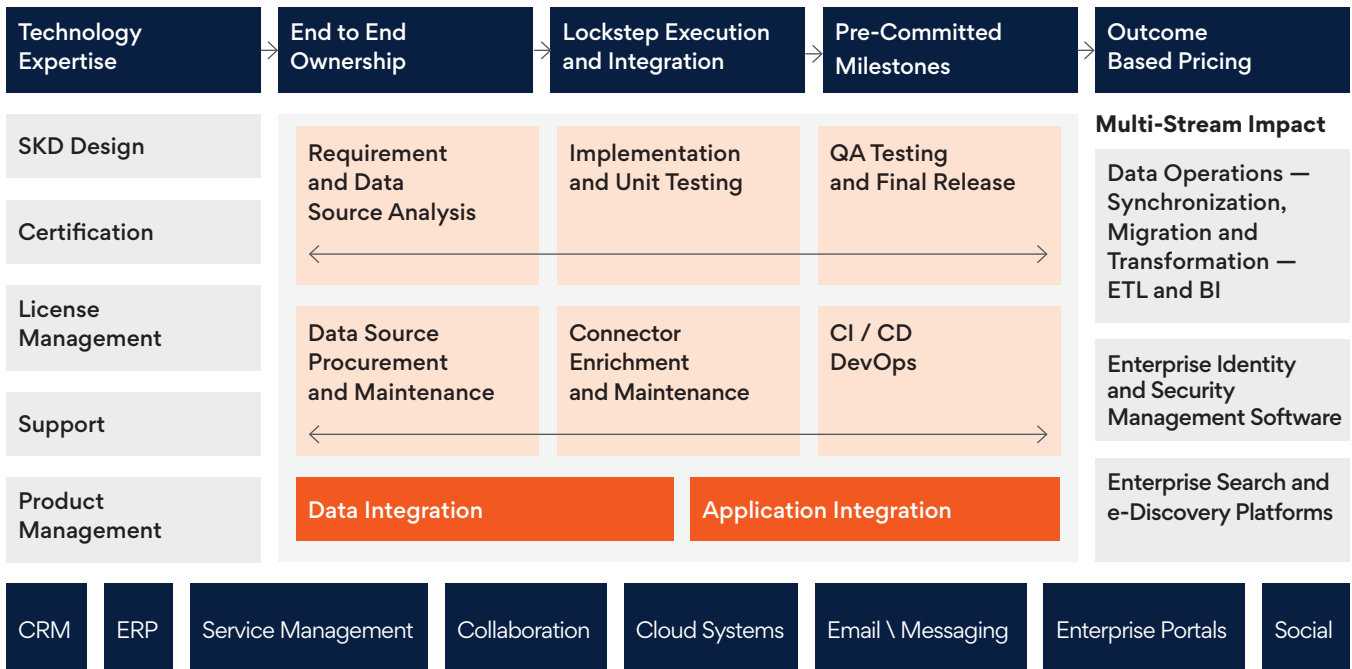

Build your Data Exchange

Data has never been more complex. With newer hybrid and business-critical data inflow, it demands accessibility, auditability, and accuracy not just in transit but also at scale. Hence, companies have no choice but to divert precious resources to create a data exchange.

However, building data connectors and pipelines in-house can quickly distract teams from their core competencies, and ongoing connector maintenance aggravates the tech debt and the risk of derailing the roadmap.

Building Blocks from Persistent Data Factory

We offer end-to-end data consultancy and execution across systems, applications, and sources with predictable integration to achieve go-live milestones that can help you avoid costly roadmap interjections.

Select from off-the-shelf template library or bespoke connectors with connector certification, support, and sustenance available as add-ons.

Technology Expertise	→	End to End Ownership	→	Lockstep Execution and Integration	→	Pre-Committed Milestones	→	Outcome Based Pricing

Multi-Stream Impact

Technology Expertise	End to End Ownership	Lockstep Execution and Integration	Pre-Committed Milestones
SKD Design	Requirement and Data Source Analysis	Implementation and Unit Testing	QA Testing and Final Release
Certification			
License Management	Data Source Procurement and Maintenance	Connector Enrichment and Maintenance	CI / CD DevOps
Support			
Product Management	**Data Integration**	**Application Integration**	

Data Operations — Synchronization, Migration and Transformation — ETL and BI

Enterprise Identity and Security Management Software

Enterprise Search and e-Discovery Platforms

CRM	ERP	Service Management	Collaboration	Cloud Systems	Email \ Messaging	Enterprise Portals	Social

Full life cycle management including development, testing, sustenance, support, certification, and data source management.

Connector Features — Complexity Increases from Left to Right →

	Sorting	Pagination	Filtering	Incremental Load
Type of Data	Structured	Semi-structured	Unstructured	
Data Transfer Mode	Synchronous	Asynchronous	Real-Time	Bulk
Data Source Type	SAAS / Cloud	On-premises

Authentication

Persistent Advantage

2,500+	**6,000+**	**30+**
Connectors	Releases	Years of Data Engineering

Proven expertise in large-scale and hybrid data operations with future-ready full connector lifecycle management.

Largest Hyperscaler

130+ connectors for integration service and an enterprise search platform, full lifecycle management

A Cloud BI Company

1,000+ connectors cloud and on-premise data sources using Connector Factory model

Analytics Process Automation Company

50+ data connectors for enhancing data integration capabilities

Accelerate your Roadmap

High predictability with off-the-shelf or bespoke connectors with industry-leading turnaround time. A complete solution with scoping, engineering, support, and sustenance built to your specific need and timeline.
